

**TASK 1: Create a GIT repository named as your enrollment number. Create 2 folder in your repository named as Assinment\_1 and Assignment\_2.**

Step 1: Create a New Local Git Repository

- I logged into GitHub..
- Clicked on “New Repository”.
- Entered my 2302031000075 as the repository name.
- Selected the repository as Public/Private.
- Clicked on “Create Repository”.

Step 2: Setting Up the Repository Locally.

- Installed Git if not already installed.
- Opened Git Bash/Command prompt.
- Ran the following command to clone my repository to my computer.
- o Git clone

<https://github.com/meshwapatel/2302031000072.git>

- Navigated to the cloned Repository:

o Cd :WT/2302031000072

Step 3: Creating Assignment Folders:

- Create Assignment folders inside the repository.
- o mkdir Assignment\_1 Assignment\_2
- Verify folders using following command.
- o ls

Step 4: Adding and Committing Changes:

- Staged the new folders:
- o Git add.
- Committed the changes with a message:
- o Git commit-m “Added Assignment\_1 and Assignment\_2 folders”
- Push the changes to Github :
- o Git push origin main
